

CDVI Electronic & Biometric Access Control

CDVI provides stable and robust solutions from stand-alone single door controllers to on-line systems controlling hundreds of locks and utilising key pads, proximity readers, radio frequency devices and the revolutionary DGID fingerprint scanner. CDVI is a major manufacturer of magnetic locks and door opening, closing and release devices to help disabled people and to deal with the requirements of the Disabilities Discrimination Act.

The **CDVI** range includes:

Key Pads: Stylish designs, rugged construction. Back-lit keypads for appropriate situations.

Proximity Readers: In a variety of styles to control various types of cards, and fobs.

Biometric Readers: The revolutionary DGID finger print scanner which reads both the pattern and the thermal imprint; quick and easy registration with proven reliability.

Access Control Systems: From Stand-Alone one or two door systems to On-Line systems able to control hundreds of doors.

Radio Frequency: Fob and keypad transmitters.

Magnets, Solenoid Bolts & Motorised Locks

Automatic Door Operators

Codringtons together with **CDVI** offer planning advice and full technical support, before, during and after installation.

Codringtons will ensure that you get the full benefit of appropriate electronic access control to match your requirements.
