

# Access Control

## A Global Access Control Group

CDVI Group is one of the market leaders in the highly competitive Access Control and Locking Systems market. Since its foundation in 1985, the group has grown quickly. Its global headquarter is located in France with subsidiaries throughout the world including offices and factories in over 15 countries encompassing 4 continents, with a turnover in excess of €40,000,000.

The CDVI Group is a highly innovative company committed to manufacturing and distributing premium products; it invests heavily in research & development each year and holds a large number of patents within the access control and locking systems market. Through extensive collaboration with suppliers, branches and research institutes, the company constantly innovates, pushing cutting edge technology forward and maintaining a continuous competitive advantage in the market.

CDVI Ltd, based in High Wycombe, was formed in 1999 as the UK & Ireland Sales & Marketing arm of the CDVI Group. Since then, with the acquisition of Link Technology and HJMS Metal Fabrication, CDVI Ltd has expanded into manufacturing within the UK.

CDVI Ltd is active in the fields of electronic locking and access control, with products ranging from Electromagnetic Locking to Keypads, Stand Alone, Biometric & On Line Access Control to Gate Automation. As well as security product manufacturing, product sectors include biometric analysis, plastic and metallic engineering.

### PREVIOUS PROJECTS

Wembley Stadium, Oxford University, Transport Research Laboratories Honda, Genetics, Local Authorities, Devon Police

## Training Days

### CATEGORIES COVERED
