

# Rotalok Rotalok™

The Rotalok™ is a unique design of padlock that features a **rotating outer sleeve** which resists all kinds of physical attack, including attempts at twisting the body of the padlock with a wrench or similar tool.

It has been selected over many years by **Central Government, the MoD** and many of the major utility companies for a wide range of security applications.

The Rotalok™ is tested and **approved to CEN grades 5 & 6**. It is available with open shackle, semi-closed shackle or **fully protected shackle**.

The Rotalok™ has the ability to **accept the widest possible range of cylinders**, allowing the end user to select the locking system of their choice - giving total **flexibility and convenience**.

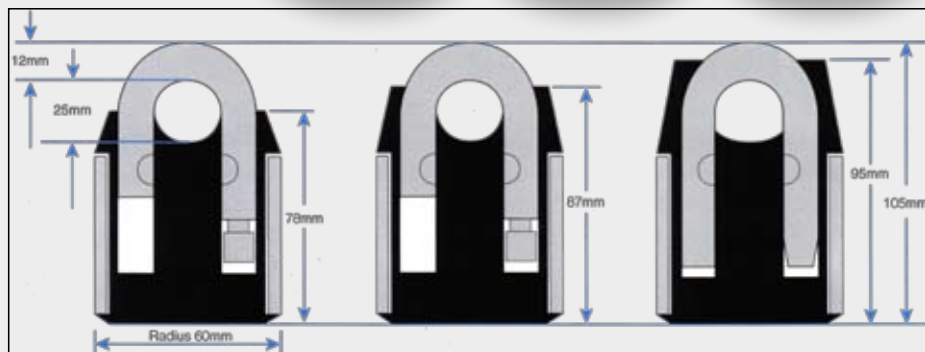

## The features of the Rotalok™ include:

- Unique outer rotating sleeve to resist torque wrench attacks
- Can be suited into almost any existing pin tumbler masterkeyed system
- Corrosion resistant and independently tested for 214 hours of salt-water spray
- 12mm case-hardened boron steel shackle
- Available with open shackle, semi-closed shackle or fully protected shackle
- The key can only be removed in the locked position for additional security
- Manufactured and tested to CEN Grades 5 & 6
- Approved for use on equipment with specific rated security products up to LPCB LPS 1175 Grade 4
- Central Government/MoD approved
- NATO Codified

Free-rotating body resists torque wrench attacks
