

Recommended For All Air Travellers

Now you can safely lock your checked luggage when travelling by air without worrying.

If airport security officials need to inspect your bag, they no longer need to cut or destroy your locks or force the bag open and risk damaging it.

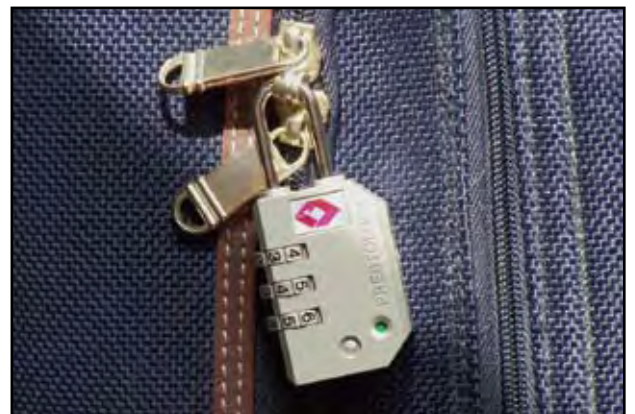

The new **SEARCHALERT** *Travel Sentry* Certified lock allows Transportation Security Administration agents to open the bag or case with a special secured access device.

Bags can then be re-locked before being quickly sent on.

SEARCHALERT has a lifetime guarantee.

*For more information please ask your local dealer for a **SEARCHALERT** leaflet.*

SEARCHALERT *Know when your belongings have been searched*
